

## ECUADOR - CLASSIC GALAPAGOS SOUTH EASTERN ISLANDS

### DAY 3: Isla Santa Fe - Plaza Sur

Santa Fe Island is home to many sea lions and these ones are very eager for swimming partners! It's a lovely place to take a dip, offers a dense concentration of wildlife, and is a fantastic place to see many of the stars of the Galapagos in one relatively small area. Expect to see Galapagos hawks, land iguanas, a variety of finches, Galapagos mockingbirds, sea lions, marine turtles, frigatebirds, Galapagos doves and lava lizards. It's a naturally beautiful island as well with one of the most attractive coves in the archipelago and the jade-green waters are ideal for snorkelling. A trail follows the coast into the opuntia forest, where you see Santa Fe's trees - the largest in the Galapagos. The island is also home to a unique sub-species of land iguanas. Hiking towards the cliffs on Santa Fe will lead you to a forest of prickly pear cactus. A member of the cactus family, their name comes from the pear-shaped fruit the plant produces. Santa Fe is home to endemic land iguanas. Once back at the beach you will have free time to snorkel back in the lagoon. Playful sea lions pups and florescent fish make for fascinating company. A small island, Plaza Sur is nonetheless a place of great beauty, where you will get close to sea lions and on to trails past one of the Galapagos' largest land iguana populations, resting amid cacti and volcanic landscapes coloured bright red and green by sesuvium. The island's rugged southern cliffs are an excellent place to spot tropicbirds and swallow-tailed gulls, as well as the 'Gentlemen's Club', a gathering of male sea lions either too young or too old to be beachmasters!

## ECUADOR - CLASSIC GALAPAGOS SOUTH EASTERN ISLANDS

### DAY 7: Isla Bartolome

Isla Bartolomé (Bartolomé Island) is one of the most spectacular volcanic landscapes in the Galapagos, full of parasitic spatter cones, lava flows, Galapagos penguins and lava lizards. It is a relatively new island in the archipelago and traces of its volcanic past can be seen everywhere, as evidenced by the amazing lunar-like landscape. The Pinnacle Rock is one of the most photographed sites in the Galapagos - an abrupt jag of rock protruding from the earth like a tooth, while nearby two golden bays back onto each other. You can hike to the top of a once-active volcano here (360 wooden steps), and enjoy superb views across to Sullivan Bay, on nearby Santiago Island. If you are in luck you might catch a glance of the Galapagos Hawk here. You also have the opportunity to go snorkelling with plenty of tropical fish, starfish, white-tipped reef sharks, rays and hopefully penguins. On Santiago's eastern coast sits Bahia Sullivan, also known as James Island. Here you walk on Pahoe-Hoe lava, from an eruption that occurred in 1897, and witness the colonisation of plant species since the last eruption. Hopefully see some marine iguanas, Sally Lightfoot crabs, sea lions, finches, turtles, sharks and penguins. On a walk, your guide will explain the geological history of the islands.

## ECUADOR - CLASSIC GALAPAGOS SOUTH EASTERN ISLANDS

paid above the standard wage. Whether it be our knowledgeable local guides, locally produced meals or the transport on tour, we do not use imported goods when local products are available. We aim to minimise our impact on the environment and give as much back as possible to the communities we work in.

While visiting the many national parks, heritage sites, museums and landmarks our travellers are encouraged to explore whilst remaining culturally aware and sensitive. We further encourage you to buy appropriate souvenirs and discourage the buying of anything wrongfully made or taken from the environment i.e. shells and endangered species products. Information on how you can be environmentally conscious, and travel responsibly will be made available in our Travellers Guides and provided during your travels by guides and staff.
