ECUADOR - CLASSIC GALAPAGOS SOUTH EASTERN ISLANDS | GRAND QUEEN BEATRIZ

DAY 1: Quito

On arrival at Quito's Mariscal Sucre International Airport you will be met and transferred to your hotel. The remainder of the day will be at your leisure. A welcome meeting will be held in the evening at either 5pm or 6 pm when you meet others travelling with you on your cruise to the Galapagos Islands. Please check with hotel reception or check the reception notice boards for the time and place of the meeting for your trip. As today is an arrival day, you can arrive at any time as there are no activities planned until this important meeting. If you can't arrange a flight that will arrive in time, you may wish to arrive a day early so you're able to attend. We'll be happy to book additional accommodation for you (subject to availability). Quito sits at high altitude under the towering Pichincha volcano. It is a beautiful city, arguably one of the most beautiful in South America. The city stretches along the valley and is surrounded by the Andes. The Old Town of Quito is awash with history, with more than 30 churches to explore, and a number of fascinating museums. La Compania de Jesus is considered to be the most beautiful and ornate churches in the Americas. The city's oldest street, Calle La Ronda, is well worth exploring. As this trip spends very little time in Quito, we recommend you spend a few extra days before or after your trip to experience all the city has to offer. You may even wish to explore further beyond the city and visit Otavalo, Cotopaxi, the Cloud Forest or the Equatorial Monument.

DAY 2: Baltra - Santa Cruz island

This morning you will be transferred to the airport for your flight to the Galapagos Islands. Please note that pick-up time can be as early as 4.30 am. This departure time allows for a 1-hour drive to the airport as well as potential check-in delays. Your tour leader will confirm this time with you at the welcome meeting on Day 1. You will be provided with a boxed breakfast today, as well as a small snack on board your 3.5-hour flight (including a brief pit stop in Guayaquil). On arrival in the Galapagos, you will be met in the arrival hall of the airport (look out for 'Grand Queen Beatriz' signs) by a transfer guide. The guide will assist you on a 5-minute public bus journey, followed by a 7-minute public ferry across Itabaca Channel to Isla Santa Cruz. Please note that public transport costs are included in the price of your trip. Once you reach Isla Santa Cruz, board a private bus for a 45-minute drive to Puerto Ayora, where two dinghies await to transport you and your fellow travellers to the Grand Queen Beatriz. Board the yacht, meet the crew and settle into your assigned cabin before a delicious lunch during which you can get to know your naturalist guide. After lunch, head up into the highlands for a total change of scenery. Beginning at the coast you'll travel across Santa Cruz through the agricultural region and into the misty forests, with the walk taking about 45 minutes. This is a lush humid zone containing miconia bushes, scalesia and inactive volcanic cones. Santa Cruz has more endemic plants than any of the other islands, and you are likely to see Galapagos giant tortoises in their natural habitat and perhaps even the bright red feathers of a vermillion flycatcher!

DAY 3: Isla Santa Fe - Plaza Sur

Santa Fe Island is home to many sea lions and these ones are very eager for swimming partners! It's a lovely place to take a dip, offers a dense concentration of wildlife, and is a fantastic place to see many of the stars of the Galapagos in one relatively small area. Expect to see Galapagos hawks, land iguanas, a variety of finches, Galapagos mockingbirds, sea lions, marine turtles, frigatebirds, Galapagos doves and lava lizards. It's a naturally beautiful island as well with one of the most attractive coves in the archipelago and the jade-green waters are ideal for snorkelling. A trail follows the coast into the opuntia forest, where you see Santa Fe's trees - the largest in the Galapagos. The island is also home to a unique sub-species of land iguanas. Hiking towards the cliffs on Santa Fe will lead you to a forest of prickly pear cactus. A member of the cactus family, their name comes from the pear-shaped fruit the plant produces. Santa Fe is home to endemic land iguanas. Once back at the beach you will have free time to snorkel back in the lagoon. Playful sea lions pups and florescent fish make for fascinating company. A small island, Plaza Sur is nonetheless a place of great beauty, where you will get close to sea lions and on to trails past one of the Galapagos' largest land iguana populations, resting amid cacti and volcanic landscapes coloured bright red and green by sesuvium. The island's rugged southern cliffs are an excellent place to spot tropicbirds and swallow-tailed gulls, as well as the 'Gentlemen's Club', a gathering of male sea lions either too young or too old to be beachmasters!

DAY 4: Gardner bay and Suarez point

After an overnight night sail you will wake up on the island of Española - the southernmost island of the Galapagos and one of the most spectacular. Because of its remote location, this island has a large population of endemic fauna. It is the breeding site for nearly all of the world's 12,000 pairs of waved albatrosses and also home to colonies of blue-footed and masked boobies. Trails from the golden beaches, where sea lions bathe and marine iguanas make their way towards the water, will lead you right through the middle of booby colonies, and Galapagos doves and mockingbirds are also often seen. You will also visit the beautiful white sandy beaches at Bahia Gardner, which are great places for swimming and relaxing. The rocks off the coast provide excellent snorkelling opportunities, with reef sharks, turtles and many species of tropical fish, including surgeon and angelfish, often seen. The small white-tipped reef sharks are also often spotted resting under the rocks. You will also pay a visit to Punta Suarez, one of the most attractive locations in the Galapagos and home to large and varied wildlife population - a walk along its trails will take you to a cliff top viewpoint, where you'll gain a magical panorama. Boobies line the rocky shoreline beneath you, while frigate birds may be seen overhead; nearby enormous male sea lions can be seen lounging and albatross use the cliffs as their 'runway', helping become airborne by the southeast winds that blow across this part of the island. If you're lucky you'll see the elaborate courtship rituals performed by albatrosses before the female chooses her lifelong mate! Stop at Bahia Gardner (Gardner Bay), which is considered by many as one of the most beautiful beaches in the Galapagos Islands and full of sea lions and hooded mockingbirds. Enjoy the beach and do some snorkelling which could be great for playing with sea lion pups and lots of fish. The rocks off the coast provide excellent snorkelling opportunities, with reef sharks, turtles and many species of tropical fish, including surgeon and angelfish, often seen. The small white-tipped reef sharks are also often spotted resting under the rocks.

DAY 5: Isla San Cristobal - Leon Dormido - Isla Lobos

This morning you will visit Punta Pitt on the eastern end of San Cristobál Island. Walk to the top of the volcanic hill for expansive views of the sparsely vegetated area. A variety of seabirds nest here, including blue-footed boobies and frigates. On a 'panga' ride you can observe the three varieties of boobies nesting in the Galapagos and enjoy a snorkel from the beach. Close by you will pass through Leon Dormido (Kicker Rock), the magnificent basalt remains of a crater in the middle of the sea, the shape resembles a sleeping lion. The rock rises 150 metres above the surface and is divided into two parts by a narrow channel. You cruise through the channel with nesting seabirds on either side of the boat, tropic birds overhead, marine iguanas in the water and many sea lions present including many resting on the rocks. Snorkelling gives us the opportunity to see Galapagos sharks, and possibly a hammerhead shark among sea turtles and an incredible biodiversity of invertebrates on the rock wall. You will also visit Isla Lobos, a tiny island almost touching San Cristobál Island. This is the perfect time to witness the always friendly sea lions as they play in the calm shallow waters here. Blue-footed boobies, frigate birds and marine iguanas are also easily seen.

DAY 6: San Cristobal Island

Visit San Cristobal Interpretation Center in the morning. This centre brings the history and geography of the archipelago to life, from its volcanic origins to the present day. The human history exhibit offers an insight into the discovery and colonisation of the Galapagos, and the reality of the problems the islands face today is also explored. Enjoy some free time for shopping before going on board for lunch and to meet the new travellers who will be joining you today. This afternoon you will travel into the interior of the island (approx. 45 mins bus ride) to visit the highlands site of 'Galapaguera of Cerro Colorado' (Red Hill) where the national park has established a breeding program and information centre for tortoises. Here, you will be able to see giant tortoises and learn all about their origin, evolution and their threatened future. Today there will be some passengers leaving the tour and some new passengers joining.

DAY 7: Bartolome Island

Isla Bartolomé (Bartolomé Island) is one of the most spectacular volcanic landscapes in the Galapagos, full of parasitic spatter cones, lava flows, Galapagos penguins and lava lizards. It is a relatively new island in the archipelago and traces of its volcanic past can be seen everywhere, as evidenced by the amazing lunar-like landscape. The Pinnacle Rock is one of the most photographed sites in the Galapagos - an abrupt jag of rock protruding from the earth like a tooth, while nearby two golden bays back onto each other. You can hike to the top of a once-active volcano here (360 wooden steps), and enjoy superb views across to Sullivan Bay, on nearby Santiago Island. If you are in luck you might catch a glance of the Galapagos Hawk here. You also have the opportunity to go snorkelling with plenty of tropical fish, starfish, white-tipped reef sharks, rays and hopefully penguins. On Santiago's eastern coast sits Bahia Sullivan, also known as James Island. Here you walk on Pahoe-Hoe lava, from an eruption that occurred in 1897, and witness the colonisation of plant species since the last eruption. Hopefully see some marine iguanas, Sally Lightfoot crabs, sea lions, finches, turtles, sharks and penguins. On a walk, your guide will explain the geological history of the islands.

DAY 8: Espumilla beach and bucaneer's cove

Today you will visit some wonderful places. Espumilla Beach, on the northern coast of Santiago Island in James Bay, is one of the most idyllic locations in the Galapagos Islands and is an important nesting site for marine turtles. With large waves, it is also often a favourite amongst beach lovers. Potentially we will see Galapagos hawks up close, ghost crabs, blue-footed boobies (often plunging for fish) and brown pelicans. It is also well known for its palo santo forest and some extraordinary lava formations. You will also visit Caleta Bucanero (Buccaneer Cove), a natural monument of rocks caused by sea erosion. This cove was used by pirates to careen their ships. It is a place of local legends and stories! It is also where Darwin camped for nine days while making his study of the islands and their wildlife. If conditions are favourable, you can enjoy some further snorkelling. Puerto Egas is a black sand beach located on the west side of James Bay and northwest of Santiago Island. South of the beach is Sugarloaf Volcano, which has deposits of volcanic tuff. This site is named Puerto Egas, after Hector Egas who last attempted to mine salt here. The walk along the beach offers hundreds of marine iguanas and Galapagos sea lions. You will also see amazing tidal pools formed from ancient lava flow and home to sponges, snails, hermit crabs, barnacles and fish. Snorkelling with the seals always offers the possibility of thrilling encounters.

DAY 9: Isla Santa Cruz - Quito

Flights to mainland Ecuador from the Galapagos Islands depart mid-morning, so an early start is necessary to make the most of today's visit to the small town of Puerto Ayora is the economic centre of the archipelago, and home to the Charles Darwin Research Station. As well as undertaking vital conservation work, the station also makes for interesting exploration and offers the best opportunities for close encounters with giant tortoises. You may also see baby tortoises and land iguanas This is your final excursion before you return to the airport in Baltra for your flight back to Quito. As you will be leaving the boat this morning, please remember that if you have enjoyed the services provided by your guide and crew, a tip would be very much appreciated by them. As a guideline we recommend each passenger consider US\$15 per day for the crew and US\$10 per day for your guide. You can leave tips in envelopes that are placed in your cabin on the last day of your journey. Upon arrival in Quito Airport you will be transferred back to your hotel for an overnight stay.

DAY 10: Quito

Your Galapagos adventure will come to an end today after breakfast. There are no activities planned for the final day so you are able to depart the accommodation at any time. There are many fascinating things to do in and around Quito, so please speak to our customer service representative about any optional activities that might be of interest. They can also assist you in booking a departure transfer to the airport.

INCLUSIONS & DETAILS

Accommodation

Cabin on board ship & hotel

INCLUSIONS

- 2 nights group hotel in Quito
- Arrival Transfer in Quito (must have flight arrival plans confirmed 30 days prior)
- Transfers in Galapagos
- Accommodation on board Grand Queen Beatriz in double cabin
- All meals during the cruise
- Guiding by Galapagos National Park Certified Guide
- All visits and excursions/landings according to the itinerary*
- Snorkel Gear (mask, tube and fins)
- Kayaks
- Unlimited purified water, coffee and tea

EXCLUSIONS

- Local Taxes
- Round trip flight to/from Galapagos
- Any other airfares unless otherwise specified in the itinerary
- Galapagos National Park Entrance fee (US\$200 per person from Aug 2024 - Subject to change)
- Galapagos Ingala card (USD 20,00 per person - Subject to change)
- Passport & Visa Expenses
- Travel Insurance
- Alcoholic & soft drinks
- Additional visits
- Additional meals
- Excess baggage charges
- Telecommunications charges (Wi-Fi is not available on the boat at all whilst in the Galapagos Islands)
- Wetsuit Hire
- Personal expenses and tips
- Items not specified

Inclusions

Difficulty Rating 2 (light adventure)

Single Surcharge A single supplement surcharge applies and is subject to availability. Please contact us for more information.
