

## INTRODUCTION

M/C Galapagos Seaman Journey is a first class catamaran offering superior comfort, size, style, and stability. The Galapagos Seaman Journey makes it possible to enjoy several cruises in the Galapagos with different itineraries that include amazing land tours on most of the Galapagos Islands. During these Galapagos Cruises, guests encounter many endemic species like Galapagos Giant Tortoises, Penguins, Land and Marine Iguanas, Frigate Birds, Blue Footed Boobies, and much more!

Please note that the below itinerary is a guide and that itineraries vary depending on departure date. Your sales consultant will provide you with more details on the different itinerary options available and applicable departure dates.

### The Seaman Journey Experience

M/C Galapagos Seaman Journey is an expeditionary first class catamaran that began sailing the Galapagos Islands in January 2008. Superior comfort, size, style, and stability are what you can expect when choosing this catamaran to fulfill your Galapagos adventures wants and needs. This vessel, with a maximum capacity of 16 passengers, provides in each of its corners, areas for rest and recreation for everyone. For the adults who might want to relax and kick back, we offer a great bar and lounge area where they are served by our bartender whilst you relax and watch the Galapagos go by. Make landings on sites that offer beautiful scenery and the ability to get up close and personal with the archipelago, accompanied by the knowledgeable staff members found on board who will offer you intel and insight into this magnificent part of the world. The M/C Galapagos Seaman Journey, another jewel from the well known Galapagos Journey Fleet, the perfect combination of adventure, comfort, service and excellence that offers four, five, eight, eleven, twelve and fifteen day itineraries.

The Seaman also offers a [5 day cruise](#), [8 day cruise](#), [11 day cruise](#), [12 day cruise](#) and [15 day cruise](#).

## DAY 2: Genovesa Island

AM: El Barranco Genovesa Island is a horse-shoe shaped island formed from the eruption of a shield volcano. Also known as Prince Philip's Steps, El Barranco has a steep rocky path leading up to a high cliff face. The cliffs are composed of very fragile lava and the natural erosion that has occurred in these lava flows has created the ideal nesting site for storm petrels. Red-footed, Nazca and masked boobies are all found here as are red-billed tropicbirds, short-eared owls and wedge-rumped storm petrels that are active during the daytime. During the panga rides along the cliffs, fur seals may be seen as well as several species of seabirds. PM: Darwin Bay The eventual collapse of one side of the caldera resulted in a submerged crater that formed Darwin Bay. The wet landing is on a beautiful white coral sandy beach. This is a favourite site for birdwatchers as red-footed boobies, masked boobies, wandering tattlers, lava gulls, whimbrels, yellow-crowned and black-crowned lava herons, swallow-tailed gulls and yellow warblers can be seen in the area. The trail climbs gradually to the edge of the cliff where you may see red-footed boobies nesting in the mangrove trees below. Other birds to have been sighted here include sharp-beaked finches, large cactus finches, ground finches, Galapagos doves and Galapagos swallows. Reaching the end the trail at the cliff's edge offers an incredible view of the island and the many birds living there.

## DAY 3: Santa Cruz Island / Santa Fe Island

AM: Plazas Plazas is located at the east of Santa Cruz Island, and forms part of two islands known as Islas Plazas. Despite its small size, some of the most interesting and outstanding species of the Galapagos are found here. The South Plaza land iguanas are the smallest in the archipelago. Marine iguanas are also abundant, as well as an occasional hybrid, a cross between a marine iguana and a land iguana. They are unique, recognizable at first glance by their black/grey colour, with a land iguana's crest, but face and tail of the marine iguana. The large population of iguanas is due to the presence of tuna, their favourite food. Swallow-tailed gulls nesting in the rugged cliffs are seen along with other sea birds such as Audubon's shearwaters, red-billed tropicbirds, frigate birds and brown pelicans. PM: Santa Fe Santa Fe or Barrington Island is a small, relatively flat island in the centre of the Galapagos archipelago. It is one of the oldest volcanoes. Santa Fe is home to two species endemic to the island - the Santa Fe land iguana and the Santa Fe rice rat. The Galapagos hawk, Galapagos snake and Galapagos mockingbird are also found here. The visit begins with a wet landing at Barrington Bay. Sea lions are found on the beach here in large numbers. Along the trail many salt bushes can be seen as well as the giant Santa Fe Opuntia (prickly pear) cactus. Snorkelling is an option here, with great possibilities of snorkelling with playful sea lions and tropical fish.

## DAY 4: San Cristobal Island

AM: Jacinto Gordillo Breeding Centre In 2004 the Jacinto Gordillo Breeding Centre (named after the famous colonist) was inaugurated, located in the north east of San Cristobal Island, to care for the smallest tortoises on the island. The breeding program on the island began in 2008 with the hatching of the first tortoise in captivity. After the morning excursion you will be taken to Baltra Airport for your flight to Quito or Guayaquil.

## SUSTAINABILITY

Being environmentally accountable is a crucial part of our organisation. Chimu is currently striving towards using less paper, taking several initiatives to do so and tracking our progress along the way. Our goal: A paperless organisation. For this reason, all information given to you will be sent electronically. We encourage those who choose to travel with us to support our aspirations and actions and ask that you reconsider printing out documentation. To view these documents, you can download them to your iPad or portable computer before and during your trip.

Chimu is passionate and dedicated to sustainability measures and understands the crucial part sustainability plays within the tourism industry.

We use local guides and office staff to both maximise local employment opportunities and minimise carbon footprint. Local guides also ensure you benefit from the intimate knowledge, passion and culture of the country you're visiting. Our guides are all highly qualified (most with university degrees) or equip with many years of experience and are paid above the standard wage. Whether it be our knowledgeable local guides, locally produced meals or the transport on tour, we do not use imported goods when local products are available. We aim to minimise our impact on the environment and give as much back as possible to the communities we work in.

Latin Trails recognizes the impact of tourism activity both on local cultures and on the environment. We realize the importance of preserving the cultural and natural heritage of
