DAY 7: Machu Picchu Guided Tour

Machu Picchu is a 15th century Inca site, located 2,430 metres above sea level on a mountain ridge above the Sacred Valley. It is the most famous of all Inca sites, but it was not until 1911 that it was brought to the world's attention by the American historian Hiram Bingham. The Incas abandoned the city just prior to Spanish colonisation, the city was never pillaged and as a result the ruins are still in fantastic condition. With its location on a dramatic ridgeline surrounded by sheer cliffs and the Urubamba River on three sides, the city of Machu Picchu is a remarkable place to visit. Machu Picchu was declared a UNESCO World Heritage Site in 1983 and in 2007 it was voted one of the new Seven Wonders of the World. The tour starts with a bus ride from Aguas Calientes to Machu Picchu. You will be astonished at your first view of Machu Picchu, a stunning display of ancient architecture with incredible surroundings. Enjoy a guided shared tour of the ruins and monuments such as the Main Square, the Circular Tower, the Sacred Solar Clock, the Royal Quarters, the Temple of the Three Windows and the Cemeteries. Return by bus to Aguas Calientes village. Please be aware that your tour of Machu Picchu does not include an entry permit to Huayna Picchu (the iconic hill behind the Machu Picchu ruins). If you want to climb Huayna Picchu then you need to pre-book your permit with at least 3 months in advance. Please contact your travel specialist if you would like to do this.

DAY 15: San Cristobal Island on board the Seaman Journey

AM: Galapaguera The Galapaguera was built to increase the population of the Galapagos tortoise that is under threat from introduced species such as wild goats and cats. It is a breeding station and sanctuary for giant tortoises and provides a good place in which to observe Galapagos tortoises in their natural habitat. San Cristobal Island is the easternmost island in the Galapagos archipelago. It has some endemic species including the San Cristobal mockingbird, San Cristobal lava lizard, leaf-toed gecko and turtles. The beach is large and serves as a nesting site for sea turtles. The females lay their eggs in the sand dunes between January and May. PM: Cerro Brujo Cerro Brujo is a beautiful white coral sand beach, with good swimming and snorkelling in the turquoise waters. It is home to a colony of sea lions and blue-footed boobies and there are great egrets and great blue herons in the lagoon behind the beach. Nazca boobies, frigate birds and shore birds can also be observed. This is the first coast where Charles Darwin went ashore in 1835. The salt water pools behind the sand dunes were used by the fishermen as a salt mine in order to preserve food for the local population. Here you may see the Chatham mockingbird and the San Cristobal lava lizard, both species being endemic to the island and unique to this area. You may also spot Galapagos turtles and with luck the small bird known as the Pájaro Brujo in Spanish, an endemic species from San Cristobal Island. The vegetation on the island includes candelabrum cacti and carob trees. Located on the north coast of Isla San Cristobal, Cerro Brujo is a peaceful place with white sand and crystal water, a perfect combination for an incredible visit.

DAY 16: Espanola Island on board the Seaman Journey

AM: Gardner Bay Española Island is the southernmost of the Galapagos Islands and one of the oldest, and due to its isolation it has a large number of endemic species including the Española mockingbird, Española lava lizard and the waved albatross. Located on the north-eastern coast of Española Island (or Hood Island as it was named by the English), Gardner Bay provides an excellent beach for relaxing, swimming, snorkelling and kayaking. The beach attracts many sea lions and you may see sharks as well as green sea turtles in the crystal clear ocean waters. PM: Suarez Point This beautiful site on the ocean front is great for spotting blue-footed boobies, albatrosses and Nazca boobies. The large waved albatrosses breed on the island and use the cliff as a launching pad. The famous attraction is the magnificent blowhole, where waves crash into a lava fissure, creating a blowhole that spurts water 30-50 metres into the air. Suarez Point presents wonderful photographic opportunities.

DAY 17: Floreana Island on board the Seaman Journey

AM: Cormorant Point Cormorant Point on Floreana Island probably offers one of the largest and best flamingo lagoons in the Galapagos. It is situated between two tuff lava cones that give the area a special atmosphere. There are various other species of shorebirds to observe including common stilts, white-cheeked pintail ducks, large-billed flycatchers, finches and other migratory birds. There are two distinct beaches: "Green Beach" (due to its high percentage of olivine crystals in the sand) and "Flour Beach" which is made up of fine, pulverized coral. Green sea turtles nest on Flour Beach and several species of rays can be seen in the waters. PM: Post Office Bay Historically, this site is the location of a wooden barrel that was placed here by the crew of a whaling ship in the 18th century. It has been used since this time by mariners and tourists as a post office. The idea is to carry letters or postcards to their destination by hand. This area was also the site of a failed colonization effort by Norwegians in 1926.
