## DAY 8: Villamar - Colchani

This morning after breakfast, we continue across Valle de los Sapos (Frog Valley), a famous rock formation caused by wind erosion. We pass the villages of Alota, Culpina K and San Cristobal. Culpina K features artwork designed by the Bolivian artist Gaston Ugalde, including several metal trees. The town is built from natural materials and the houses painted with natural pigmentation. San Cristobal was relocated from its original location because of the zinc and silver deposits in the vicinity. The San Cristobal silver mine is one of the largest silver mines in the world. The colonial church was moved stone by stone from its original location. A picnic lunch is included. We also visit the cemetery of old trains on the outskirts of Uyuni. Uyuni was an important transportation hub and in the late 19th century, rail lines were built by British engineers and the trains carried minerals to the Pacific Ocean ports. After the collapse of the mining industry in the 1940's, many trains were abandoned outside Uyuni with the resulting Train Cemetery. The salt winds have led to the corrosion of the metal. At the end of the tour we continue on towards Colchani on the edge of the Uyuni salt flats. Dinner is included at the hotel.

**DAY 9: Uyuni Salt Flat - Uyuni**

This morning after breakfast we set off across the Great Salt Flats to Colchani village, where we observe the methods of salt extraction and salt processing. We continue to Incahuasi Island (better known as Fish Island) - an oasis with a unique and isolated ecosystem that features algae and fossils. Against the backdrop of the salt flats extending to the horizon, this landscape makes for spectacular photos. After a picnic lunch, we travel north to visit the pre-Colombian Pucara de Ayque fort and the nearby chullpares on the foothills of Thunupa volcano. We then head east to Uyuni. Uyuni, founded in 1889 by Bolivian president Aniceto Arce, is still an important military base. It lies in south-western Bolivia, 3,670 metres above sea level and situated on the edge of the Salar de Uyuni, the largest salt flat in the world. The Salar de Uyuni covers over 10,000 square kilometres of the Bolivian Altiplano and is fringed by the mountains of the Andes. Beneath it lies the world's largest lithium reserve estimated to be about 100 million tons and accounting for around 70% of the world's lithium reserves. The salt in the salt flats is over 120 metres deep. The area is remote, arid and cold, stark, yet stunning, boasting extraordinary beauty and a silence that is captivating.

**DAY 12: Tiwanaku Ruins**

Tiwanaku is a 1.5 hour drive from La Paz, located near the southern shores of Lake Titicaca on the Altiplano, at an altitude of 3,850 metres. Tiwanaku was the spiritual and political centre of the Tiwanaku culture that dates back to 1500BC - 1000AD. It was one of the most important pre-Inca civilizations and considered to be among the most developed at the time. The Tiwanaku people were outstanding in agriculture, hydraulics, architecture and medicine, as well as in social organization, but due to an economic crisis caused by a long dry season, Tiwanaku collapsed around 1,000 AD. The city of Tiwanaku was the capital of this powerful pre-Hispanic empire that dominated a large area of the southern Andes and beyond, reaching its height between 500 and 900 AD. Most of the ancient city, built largely from adobe, has been overlaid by the modern town. The monumental stone buildings of the ceremonial centre, however, survive in the protected archaeological zones. The main constructions visited during this tour include the Kalasasaya Temple and the Gate of the Sun constructed out of stone, Ponce and Fraile monoliths, the Pyramid of Akapana and the semi-underground temple. We also visit two local museums to view pottery and stone work and to learn more about the culture.
