Magnificent mountain scenery, glaciers galore, icebergs, a rich historical tapestry, and an incredible array of wildlife will astound you as we travel down South Georgia’s leeward coast. We’ll also visit historic Grytviken whaling station, featuring the tiny graveyard where Shackleton is buried with his right-hand man Frank Wild beside him.

## DAY 13: Scotia Sea - Day 13 to 14

Heading farther south, we’ll continue our informative presentations and wildlife spotting as the icebergs become bigger and more plentiful.

## DAY 15: Antarctica - Day 15 to 18

Hopping into our inflatable Zodiac boats, we’ll spend as much time as possible exploring. Be prepared to marvel up close at nature’s glory as we set a course for the most scenic bays and channels of the Peninsula. ## SUSTAINABILITY

We appreciate that voyages to the Antarctic to have an impact on this pristine environment. In light of this, all our voyages are double carbon offset. In addition, we strive to eliminate as many single use plastics as possible from our supply chain. In choosing this voyage you are also supporting the fantastic work done by the Antarctic Science Foundation (ASF) and their work in understanding and protecting this unique destination. In addition all voyages support the Mawsons Huts Foundation (MHF). The MHF support the legacy of Sir Douglas Mawson, the legendary Antarctic explorer and scientist. As a member of IAATO we follow strict guidelines appointed by the Antarctic Treaty System to go above and beyond in support of minimizing negative impacts on this

pristine landscape. We also encourage clients to look to book pre-and post-accommodation with us, where local businesses will be supported. Our clients also receive restaurant recommendations which support locally owned restaurants.

We carefully select all ships we work with and choose smaller sized vessels to create less impact. We use a highly regulated, licensed vessel which is well equipped to operate in the Antarctic’s delicate ecosystem. We view the voyage to the Antarctic as an expedition, not a sightseeing trip. Smaller ships such as ours can navigate narrow waterways and are far less polluting than the larger ships in Antarctic waters. By carrying less passengers, we have far less waste. The waste is carried back to the home port to allow for environmentally conscious waste management and disposal.
