

## GALAPAGOS OF THE SOUTHERN OCEAN FROM DUNEDIN

### INTRODUCTION

Undertake one of the most inspirational and unforgettable journeys to the unique sites of the Southern Ocean. The Subantarctic Islands are dubbed the 'Galapagos of the Southern Ocean' due to their incredibly rich biodiversity. This expedition experience will have you encountering vast colonies of penguins, fur and elephant seals. You will also spot unique seabirds including albatross, petrels, shearwaters and prions. Discover four of the Subantarctic Islands on this incredible adventure as you immerse yourself in some of the most remote and isolated islands of the world, each unique and filled with incredible vistas and varied ecosystems. From rocky shores to open plains of incredible 'megaherbs'. This is a truly unforgettable and unique expedition experience close to home.

### COVID-19 Safety Measures

In light of the current global situation Chimu Adventures continues to monitor both the local and global situation to provide the most up to date information regarding Covid-19 safety. The following measures will be undertaken on the to ensure the upmost degree of safety:

- The Enderby will work alongside local health and immigration authorities at destinations and ports to implement any requirements and best practice prior to departure.
- All embarking guests will be screened as per CLIA pre-boarding protocol which currently includes answering a series of questions, passport check and taking each guests' temperature. Should a guest's temperature exceed 38°C, enhanced screening and medical support will be provided as well as a detailed recent travel history review.
- The shipboard medical team will closely monitor US CDC Health Alerts for Healthcare Professionals and implement all recommended measures.
- While on board, should any guest present with any influenza-like illness they will be immediately isolated while crew follows the CDC Interim Healthcare Infection Prevention and Control Recommendations for Patients Under Investigation for

COVID-19 Coronavirus.

Guests travelling from Australia are recommended to monitor the relevant updates and receive further information from the [Australian Ministry of Health](#). Cruises from New Zealand departing from November to March will be operated based on regular government border restrictions, for more information you may refer to the [New Zealand Ministry of Health](#).

### ITINERARY

#### DAY 1: Embarkation in Dunedin

Passengers should make their way to the Distinction Dunedin Hotel in the central city where our group will spend the first night of the expedition. This evening there will be an informal get-together at the hotel for dinner; an excellent opportunity to meet fellow adventurers on your voyage and some of our expedition team

#### DAY 2: Otago Harbour

Take breakfast at your leisure in the hotel restaurant before transferring to the port to embark the Spirit of Enderby. You will have the opportunity to settle into your cabin and familiarise yourself with the ship; we will also take the opportunity to conduct several compulsory safety briefings. You are invited to join the expedition team and captain on the bridge as we set our course to The Snares and our adventure begins. As we leave the harbour, we will sail alongside the wildlife rich Otago Peninsula, Northern Royal Albatross breed here and they can often be observed overhead. Turning the bow south we may start to encounter our first cetaceans of the voyage.

### DAY 3: The Snares - North East Island

The closest Subantarctic Islands to New Zealand, they were appropriately called The Snares as they were once considered a hazard for sailing ships. Comprising of two main islands and a group of five islands called the Western Chain; they are uninhabited and enjoy the highest protection as Nature Reserves. It is claimed by some that these islands are home to more nesting seabirds than all the British Isles together. We plan to arrive mid-morning and as landings are not permitted, we will Zodiac cruise along the sheltered eastern side of the main island if the weather and sea conditions are suitable. In the sheltered bays, we should see the endemic Snares Crested Penguin, Snares Island Tomtit and Fernbirds. Cape Pigeons, Antarctic Terns, White-fronted Terns and Red-billed Gulls are also present in good numbers. There are hundreds of thousands of Sooty Shearwaters nesting on The Snares; the actual number is much debated. The Buller's Albatross breed here from early January onwards.

### DAY 4: Enderby Island

The Auckland Islands group was formed by two volcanoes which erupted some 10-25 million years ago. They have subsequently been eroded and dissected by glaciation creating the archipelago as we know it today. Enderby Island is one of the most beautiful islands in this group and is named for the same distinguished shipping family as our own vessel. This northern most island in the archipelago is an outstanding wildlife and birding location and is relatively easy to land on and walk around. The island was cleared of all introduced animals (pests) in 1994 and both birds and the vegetation, especially the herbaceous plants, are recovering both in numbers and diversity. During our day ashore there will be several options, some longer walks, some shorter walks and time to spend just sitting and enjoying the wildlife. The walking is relatively easy, a board walk traverses the island to the dramatic western cliffs from there we follow the coast on the circumnavigation of the island. Birds that we are likely to encounter include the following species: Southern Royal Albatross, Northern Giant Petrel, Auckland Island Shag, Auckland Island Flightless Teal, Auckland Island Banded Dotterel, Auckland Island Tomtit, Bellbird, Pipit, Redcrowned Parakeet, Yellow-eyed Penguin and Light-mantled Sooty Albatross.

### DAY 5: Carnley Harbour

In the south of the archipelago there is a very large sheltered harbour it is rich in human history including shipwrecks, treasure hunters, Coastwatchers and of course scientific parties. We plan to arrive early morning from our anchorage at Enderby Island. We enter the harbour through the eastern entrance which is guarded on both sides by dramatic cliffs and rugged tussock covered hills. Our activities here today are totally weather dependent. We have several options. If the weather is OK, there will be an opportunity for the more energetic expeditioners to climb to the South West Cape and visit the Shy Mollymawk colony. Above the colony we occasionally see Gibson's Wandering Albatross breeding. This climb provides magnificent views in all directions, especially over the western entrance to Carnley Harbour, Adams Island and Western Harbour. For those not able to make the climb (it is reasonably difficult) there will be an opportunity to Zodiac cruise along the coast of Adams Island and Western Harbour, with landings in the later. Other options include the Tagua Bay Coastwatcher's hut and lookout (the former is derelict) which was occupied during the Second World War. We could visit Epigwatt and the remains of the 'Grafton' which was wrecked here in 1864.

### DAY 6: At Sea

As we make our way south through the Furious Fifties also known as the Albatross latitudes, the birding especially south of the Auckland Islands should be good. We will have a series of informal lectures on the biology and history of the Subantarctic Islands. We will also prepare you for our visit to Macquarie Island

### DAY 7: Macquarie Island - Day 7 to 8

The great Australian Antarctic Explorer Sir Douglas Mawson once called Macquarie Island "One of the wonder spots of the world." You are about to discover why as we spend two days exploring this amazing Island. It was one of the first of the Subantarctic Islands to obtain World Heritage Status and that was largely due to its unique geology. It is one of the few places on earth where mid-ocean crustal rocks are exposed at the surface due to the collision of the Australian and Pacific Plates. Macquarie Island is home to four species of penguin, Kings, Royals, Gentoo and Rockhopper. The Royal Penguin occurs nowhere else in the world. During our visit we will land at two sites (subject of course to weather and sea conditions) and you will get a chance to see, observe and photograph all four species, although the Rockhopper is much harder to capture than the others. We plan a landing at the Australian Antarctic Research Base at Buckles Bay where you will be able to meet with scientists and base staff. The original base was established in 1947 and the island has been 'manned' since then. It is one of the longest continuously occupied bases in the Subantarctic. We depart for Campbell Island on the afternoon of the second day.

### DAY 9: At Sea

Today is very similar to Day 6 except we are north bound and hopefully running with the prevailing weather which should make it a bit more comfortable. There will be briefings and lectures on Campbell Island in preparation for our visit there and opportunities for pelagic birding and/or simply relaxing.

## GALAPAGOS OF THE SOUTHERN OCEAN FROM DUNEDIN

DAY 10: Campbell Island - Perseverance Harbour  
- Day 10 to

We have plenty of time to explore Campbell Island, New Zealand's southernmost Subantarctic territory. Its history is as rich and varied as the other islands we have visited. Discovered in 1810 (by the same sealing captain who discovered Macquarie Island) it too was soon occupied by sealers who introduced rats and cats. In 1895 the New Zealand government advertised the island as a pastoral lease. The lease was taken up by an entrepreneurial New Zealand sheep farmer who stocked the island with sheep and cattle. The farming practices, which included burning the scrub, modified the island considerably. Coastwatchers were stationed on the island during the war, at the end of the war the station was taken over by the New Zealand Metrological service and they maintained a manned weather/research station on the island until 1995. We will offer several options which will enable you to explore the island. There will be extended walks to Northwest Bay and possibly Mt Honey. There will also be an easier walk to the Col Lyall Saddle. All these options will allow you the opportunity and time to enjoy the Southern Royal Albatross which nest here in large numbers. We also visit areas of the island which contain outstanding examples of the mega herbs for which the island is renown. Other birds we should see include Light-mantled Sooty Albatross, Northern Giant Petrel, Southern Skua, Red-billed Gull, Blackbacked Gull, Antarctic Tern, Redpoll, Dunnock and New Zealand Pipit.

DAY 12: At Sea

At sea en route to the Port of Bluff, take the opportunity to relax and reflect on an amazing experience. We will recap the highlights of our expedition and enjoy a farewell dinner tonight as we complete the last few miles of our journey.

### DAY 13: Disembarkation in Invercargill

Early this morning we will arrive in the Port of Bluff. After a final breakfast and completing Custom formalities we bid farewell to our fellow voyagers and take a complimentary coach transfer to either a central city point or to the airport. In case of unexpected delays due to weather and/or port operations we ask you not to book any onward travel until after midday this day.

## SUSTAINABILITY

Being environmentally accountable is a crucial part of our organisation. Chimu is currently striving towards using less paper, taking several initiatives to do so and tracking our progress along the way. Our goal: A paperless organisation. For this reason, all information given to you will be sent electronically. We encourage those who choose

## GALAPAGOS OF THE SOUTHERN OCEAN FROM DUNEDIN

to travel with us to support our aspirations and actions and ask that you reconsider printing out documentation. To view these documents, you can download them to your iPad or portable computer before and during your trip.

Chimu is passionate and dedicated to sustainability measures and understands the crucial part sustainability plays within the tourism industry.

We use local guides and office staff to both maximise local employment opportunities and minimise carbon footprint. Local guides also ensure you benefit from the intimate knowledge, passion and culture of the country you're visiting. Our guides are all highly qualified (most with university degrees) or equip with many years of experience and are paid above the standard wage. Whether it be our knowledgeable local guides, locally produced meals or the transport on tour, we do not use imported goods when local products are available. We aim to minimise our impact on the environment and give as much back as possible to the communities we work in.

While visiting the many national parks, heritage sites, museums and landmarks our travellers are encouraged to explore whilst remaining culturally aware and sensitive. We further encourage you to buy appropriate souvenirs and discourage the buying of anything wrongfully made or taken from the environment i.e. shells and endangered species products. Information on how you can be environmentally conscious, and travel responsibly will be made available in our Travellers Guides and provided during your travels by guides and staff.

For more information on our sustainability policies, including how we are striving towards being a paperless organisation, click [HERE](#)
