

INTRODUCTION

Departing from Sydney in the early evening, you will fly into the night, to witness one of the world's most magical natural phenomena, the Aurora Australis or Southern Lights before arriving back to Sydney just after sun up. On board a Qantas Boeing 787-9 Dreamliner, you will travel over the Southern Ocean heading for the Southern Auroral Zone. This spectacular scenic flight will take you far away from light pollution, high above the clouds and weather systems for a unique unobstructed view of the incredible light display of the Southern Lights. The exact route will depend on the activity of the Aurora Australis on the night. Seeing the Southern Lights from the comfort of the Qantas Dreamliner is an ethereal, magical and unforgettable experience.

Throughout the flight you will receive a full inflight catering service in both business and economy classes. Expert astronomers will provide information on route about how an aurora is created, as well as pointing out their favourite night sky objects. They will instruct you on how to photograph an aurora and we will have a professional photographer on board to assist on how best to use your cameras.

This is a unique trip not to be missed!
