INTRODUCTION

EARLY BIRDS: Book and Save up to 15%* on selected cabins. Conditions apply, contact us for more details.

Combine Falkland Islands~Malvinas with the dazzling scenery and wildlife of South Georgia, and the Antarctic Peninsula for a truly unforgettable voyage. The Falklands~Malvinas offers rich history, sensational landscapes and outstanding bird-watching opportunities. Even though you've seen it countless times on television, nothing compares with personally hearing, smelling, and seeing the magnitude of South Georgia's massive king penguin colonies and beaches alive with fur seals and elephant seals, fighting, mating, breeding, and suckling. In the Antarctic Peninsula, Zodiac-cruises reveal hunting orcas, calving glaciers, humpbacks feeding, and penguins fledging; it's an action-filled environment where every creature is fighting to survive.

ITINERARY

DAY 1: Arrive Ushuaia

Arrive in Ushuaia, where you will be met and transferred to your downtown hotel (preferred flights only).

ANTARCTICA - FALKLANDS, SOUTH GEORGIA & ANTARCTICA | GREG MORTIMER

DAY 2: Embark the Greg Mortimer in Ushuaia

This morning, enjoy a leisurely breakfast at the hotel before exploring Ushuaia on a half-day city tour. Ushuaia, capital city of the province of Tierra del Fuego, is located on the shores of the Beagle Channel and it is surrounded by the Martial Range, which offers a unique landscape as a result of the combination of mountains, sea, glaciers and forest. The city tour will visit The Mission, Brown and Solier neighbourhoods, where you can see old houses belonging to the first families in Tierra del Fuego, such as the Beban, the Pastoriza, and the Ramos. Head 11 kilometres (6.8 miles) out of town to Martial Glacier. The ride in the chair lift to the trails leading up to the glacier provides wonderful regional views and of Ushuaia town, the Beagle Channel and its islands. Afterwards, continue to the End of the World Museum with exhibitions explaining the history of Tierra del Fuego. Transfer to the pier where our expedition team will warmly welcome you on board the Greg Mortimer at approximately 4.00 pm. As the Greg Mortimer pulls away from port, we'll gather on the deck to commence our adventure with spectacular views over Ushuaia and Tierra del Fuego. You'll have time to settle into your cabin before our important briefings.

DAY 3: At Sea

As we commence our trip across the South Atlantic Ocean, we make the most of our time getting comfortable with the motions of the sea. Our expedition team prepare you for our first landing with important wildlife guidelines and biosecurity procedures, and start our lecture program to help you learn more about Antarctica's history, wildlife and environment. Our wildlife experiences begin as we enjoy watching and photographing the many seabirds, including majestic albatrosses and giant petrels following in our wake. They rise and fall skilfully, using air currents created by the ship to gain momentum.

ANTARCTICA - FALKLANDS, SOUTH GEORGIA & ANTARCTICA | GREG MORTIMER

DAY 4: Falklands - Malvinas - Day 4 & 5

Located 477 kilometres (296 miles) east of southern Argentina, the Falklands~Malvinas is a unique mix of being a wildlife hotspot and inhabited outpost. An archipelago of over 700 islands, but consisting of two main islands, East and West, only seven of the islands are inhabited. The cold nutrient-rich waters surrounding the islands makes them a prime location for marine life, including seabirds and seals. Our time in the Falklands~Malvinas includes a short walk in historic Stanley town. Our experienced expedition team, who have made countless journeys to this area, will use their expertise to design our voyage over the next two days. This allows us to make best use of the prevailing weather and wildlife opportunities. In addition to Stanley, there are many exciting places we can choose to visit; a sample of some of the places where we may land, hike, and photograph or view spectacular wildlife include: Jason Island - rarely visited jewel and the most remote of all West Falklands islands. Saunders Island - rich in wildlife and history, the island boasts four species of penguins and a spectacular black-browed albatross colony on its northern cliffs. Carcass Island - a haven for small birds including endemic Cobb's Wren, dark ground tyrants, tussac birds, and striated caracaras abound. West Point Island - home to numerous species of plants, birds and marine mammals, spectacular cliffs are a feature along the coastline, Sealion Island - an important bird area with Gentoo, Magellanic and Rockhopper penguins, Cobb's wren, Magellanic snipe and tussac birds. 95 percent of the Falklands' elephant seal population live here.

DAY 6: At Sea - Day 6 to 8

Between the Falklands~Malvinas and South Georgia, you will be entranced by the ceaseless flight of the many seabirds that follow our wake, skillfully using the air currents created by the ship to gain momentum. On this leg, we are usually travelling into the prevailing weather so it is difficult to estimate our precise arrival time in South Georgia. Our lecture program will continue highlighting all of the incredible sights we have witnessed over the past few days. You will have ample time to enjoy observing the sea birds, whale-watching from the observation areas, or simply relaxing with a book. If time and weather conditions permit, we may pass close to Shag Rocks, a fascinating group of jagged rocky islets protruding from the sea, in the proximity of South Georgia.

ANTARCTICA - FALKLANDS, SOUTH GEORGIA & ANTARCTICA | GREG MORTIMER

DAY 9: South Georgia - Day 9 to 12

Over the next few days, marvel at South Georgia’s incredible scenes such as enormous and bustling king penguin colonies, fur seals jostling for space on the beach, jaw-dropping mountain landscapes and learn of Shackleton’s epic rescue journey. On Zodiac-cruises, discover bays filled with raucous and playful fur seals, and land on pebble beaches to meet curious penguins. Challenge yourself on hikes and enjoy dazzling pristine landscapes seen by few. South Georgia is a place where you can truly feel like you’ve really escaped from your normal daily life. South Georgia is one of the world’s most amazing natural environments. Just a speck in the vastness of the South Atlantic Ocean, and lying wholly within the Antarctic Convergence, South Georgia and the South Sandwich Islands are a life-sustaining haven to some of the world’s largest congregations of wildlife. The surrounding sea is one of the most productive areas on Earth and supports the life of millions of seals, whales, penguins and other seabirds. A mountain range forms the spine of this long, narrow island. Between the mountains, shattered glaciers carve their way through tussock grass to the deeply indented coastline – a landscape that is synonymous with the epic expedition of survival by Shackleton, Worsley, and Crean. Abandoned rusting whaling stations and remnants of explorers reflect a time of long ago, while summer workers conduct scientific and regeneration projects. As we explore South Georgia, we will have the opportunity to reflect on Shackleton’s epic journey. If conditions permit, we plan to follow in Shackleton, Worsley, and Crean’s footsteps and complete the final leg of their walk from Fortuna Bay to Stromness. A sample of some of the places where we may land in South Georgia include: Grytviken - originally a Norwegian sealing and whaling station, it was finally closed in 1965. Sir Ernest Shackleton’s body was laid to rest at Grytviken. St Andrews Bay - the long black sandy beach fronts a broad valley that stretches well back from the sea. This valley shelters the largest king penguin colony on South Georgia. Godthul - imagine indented bays lined with bleached whale bones, teeming with fur seals and penguins just ‘hanging about’. A careful descent leads us to a magnificent Macaroni penguin rookery. Salisbury Plains - Salisbury Plain has one of the largest king penguin colonies on South Georgia. With about 100,000 pairs, the shore and beach can be completely crammed with penguins. Along the beach you will also find fur and elephant seals in the mix. Fortuna Bay & Stromness - Fortuna Bay is surrounded by high mountains with glaciers pushing down from the high country to terminate in the open valley that is home to a small king penguin colony. This is where Shackleton, Worsley, and Crean descended from the treacherous glaciers of the interior on their way to Stromness whaling station.

ANTARCTICA - FALKLANDS, SOUTH GEORGIA & ANTARCTICA | GREG MORTIMER

DAY 13: At Sea - Day 13 & 14

En route to the Antarctic Peninsula we'll head across the Scotia Sea, following the route that Shackleton and five of his men took in order to find help for the rest of their crew. On 24 April, 1916, they piled into the James Caird, the most seaworthy of their open boats, to attempt this perilous journey to South Georgia - some 1,290 km / 801 mi. distance. Shackleton hoped to reach South Georgia in two weeks. There he would enlist the help of the whalers to return to Elephant Island and rescue the men who had been left behind. As excitement builds for our arrival to Antarctica, be out on deck or from the open bridge to spot large iceberg.

DAY 15: Antarctic Peninsula - Day 15 to 19

Over the next few days a host of choices are open to us, and depending on ice and weather conditions, the western side of the Antarctic Peninsula is ours to explore. Our experienced expedition team, who have made countless journeys to this area, will use their expertise to design our voyage from day to day. This allows us to make best use of the prevailing weather, ice conditions and wildlife opportunities. Because we are so far south, we will experience approximately 18-20 hours of daylight and the days can be as busy as you wish. We will generally try for two landings or Zodiac excursions each day; cruising along spectacular ice cliffs; following whales that are feeding near the surface; and landing on the continent and its off-shore islands to visit penguin rookeries, seal haul outs, historic huts, and a few of our other favourite spots along the peninsula. There will be plenty of time for sleep when you get home! There are many exciting places we can choose to visit and our itinerary is deliberately flexible to allow us to pick the best spots on the day based on ice and weather conditions. A sample of some of the types of places where we may cruise through, land, hike, photograph or view spectacular wildlife include: Beautiful protected bays around the Antarctic Peninsula surrounded by magnificent peaks and spectacular glaciers, areas that are havens for whales as we keep our eyes open for humpbacks, orcas, minkes, and crabeater seals, as we explore bays in Zodiacs. Wildlife-rich islands where glaciers and mountains dominate the vista and we can see large chinstrap penguin colonies tucked in between basaltic turrets coloured by yellow and orange lichens, and where often fur seals and elephant seals are hauled out on the pebble beaches. Harbours home to gentoo penguins, and that regularly host Weddell seals. The scenery is dramatic towering peaks and calving glaciers surround the harbour. The thundering crack of the glaciers as they calve is sure to stop you in your tracks. Lemaire Channel - If ice conditions allow, standing on the observation deck of the Greg Mortimer quietly as the ship sails along the narrow Lemaire Channel could certainly be one of the highlights of our voyage. Cliffs tower 700 metres / 2,296 feet straight out of the ocean on either side of the ship. The water can sometimes be so still that perfect reflections are mirrored on the surface and it is clear to see why this Channel is often called "Kodak Alley". Gigantic icebergs may clog the channel, creating navigational challenges for our Captain and crew; occasionally they may even obstruct our passage.

DAY 20: At Sea

On our return sailing to Ushuaia, you may choose to spend your time editing photos, enjoying the onboard facilities, or listening to an informative lecture.

DAY 21: Disembark Ushuaia

During the early morning, we sail along the Beagle Channel, before quietly slipping into dock in Ushuaia, where we begin disembarking at around 8.00 am. Farewell your expedition team and fellow travellers as we all continue our onward journeys, hopefully with a newfound sense of the immense power of nature. A transfer to either downtown Ushuaia or to the airport is included in the cost of the voyage.

SUSTAINABILITY

GUIDANCE FOR VISITORS TO THE ANTARCTIC

RECOMMENDATION XVIII-1, ADOPTED AT THE ANTARCTIC TREATY MEETING, KYOTO, 1994

Activities in the Antarctic are governed by the Antarctic Treaty of 1959 and associated agreements, referred to collectively as the Antarctic Treaty System. The Treaty established Antarctica as a zone of peace and science.

In 1991, the Antarctic Treaty Consultative Parties adopted the Protocol on Environmental Protection to the Antarctic Treaty, which designates the Antarctic as a natural reserve. The Protocol sets out environmental principles, procedures and

ANTARCTICA - FALKLANDS, SOUTH GEORGIA & ANTARCTICA | GREG MORTIMER

obligations for the comprehensive protection of the Antarctic environment, and its dependent and associated ecosystems. The Consultative Parties have agreed that as far as possible and in accordance with their legal system, the provisions of the Protocol should be applied as appropriate. The Environmental Protocol was ratified in January 1998.

The Environmental Protocol applies to tourism and non-governmental activities, as well as governmental activities in the Antarctic Treaty Area. It is intended to ensure that these activities, do not have adverse impacts on the Antarctic environment, or on its scientific and aesthetic values.

This Guidance for Visitors to the Antarctic is intended to ensure that all visitors are aware of, and are therefore able to comply with, the Treaty and the Protocol. Visitors are, of course, bound by national laws and regulations applicable to activities in the Antarctic.

PROTECT ANTARCTIC WILDLIFE

Taking or harmful interference with Antarctic wildlife is prohibited except in accordance with a permit issued by a national authority.

Do not use aircraft, vessels, small boats, or other means of transport in ways that disturb wildlife, either at sea or on land.

Do not feed, touch, or handle birds or seals, or approach or photograph them in ways that cause them to alter their behavior. Special care is needed when animals are breeding or molting.

Do not damage plants, for example by walking, driving, or landing on extensive moss beds or lichen-covered scree slopes.

Do not use guns or explosives. Keep noise to the minimum to avoid frightening wildlife.

Do not bring non-native plants or animals into the Antarctic, such as live poultry, pet dogs and cats, or house plants.

RESPECT PROTECTED AREAS

A variety of areas in the Antarctic have been afforded special protection because of their particular ecological, scientific, historic, or other values. Entry into certain areas may be prohibited except in accordance with a permit issued by an appropriate national authority.

Activities in and near designated Historic Sites and Monuments and certain other areas may be subject to special restrictions.

Know the locations of areas that have been afforded special protection and any restrictions regarding entry and activities that can be carried out in and near them. Observe applicable restrictions.

Do not damage, remove, or destroy Historic Sites or Monuments or any artifacts associated with them.

RESPECT SCIENTIFIC RESEARCH

Do not interfere with scientific research, facilities or equipment.

Obtain permission before visiting Antarctic science and support facilities; reconfirm

TRIP CODE

ANTARCTICA - FALKLANDS, SOUTH GEORGIA & ANTARCTICA | GREG MORTIMER

arrangements 24-72 hours before arrival; and comply with the rules regarding such visits.

Do not interfere with, or remove, scientific equipment or marker posts, and do not disturb experimental study sites, field camps, or supplies.

BE SAFE

Be prepared for severe and changeable weather and ensure that your equipment and clothing meet Antarctic standards. Remember that the Antarctic environment is inhospitable, unpredictable, and potentially dangerous.

Know your capabilities and the dangers posed by the Antarctic environment, and act accordingly. Plan activities with safety in mind at all times.

Keep a safe distance from all wildlife, both on land and at sea.

Take note of, and act on, the advice and instructions from your leaders; do not stray from your group.

Do not walk onto glaciers or large snow fields without the proper equipment and experience; there is a real danger of falling into hidden crevasses.

Do not expect a rescue service. Self-sufficiency is increased and risks reduced by sound planning, quality equipment, and trained personnel.

Do not enter emergency refuges (except in emergencies). If you use equipment or food from a refuge, inform the nearest research station or national authority once the emergency is over.

Respect any smoking restrictions, particularly around buildings, and take great care to safeguard against the danger of fire. This is a real hazard in the dry environment of Antarctica.

KEEP ANTARCTICA PRISTINE

Antarctica remains relatively pristine, the largest wilderness area on Earth. It has not yet been subjected to large-scale human perturbations. Please keep it that way.

Do not dispose of litter or garbage on land. Open burning is prohibited.

Do not disturb or pollute lakes or streams. Any materials discarded at sea must be disposed of properly.

Do not paint or engrave names or graffiti on rocks or buildings.

Do not collect or take away biological or geological specimens or man-made artifacts as a souvenir, including rocks, bones, eggs, fossils, and parts or contents of buildings.

Do not deface or vandalize buildings or emergency refuges, whether occupied, abandoned, or unoccupied.
