DAY 2: Cape Horn

After an overnight crossing of Nassau Bay, you awake in full view of legendary Cape Horn! Weather permitting, board a Zodiac and be one of the few privileged adventurers to step foot on this famous and rarely visited island. Back on board, set sail towards Antarctica and cross the famous passage named in honour of Sir Francis Drake, the great 16th century British explorer.

DAY 3: Drake Passage

As you sail through the Drake Passage en route to King George Island, in the South Shetland Islands, attend an engaging program of lectures and presentations. In the company of expert guides, watch for wildlife from the glass-enclosed lounge or from the outside decks. You may spot magnificent sea birds, such as albatrosses and petrels, as well as different species of whales on their way south to Antarctica.

DAY 4: At Sea

After crossing the Antarctic Convergence, the environment changes noticeably. Keep your camera ready, as this is the time to watch for the first icebergs and the first sight of Antarctic land. Reaching the South Shetland Islands, sail in ice-filled bays, while enjoying the company of sea birds, penguins, seals and whales. Board a Zodiac for your first memorable shore visit to a penguin colony. Taking advantage of the endless Antarctic daylight, exploration will continue well into the evening.

SUSTAINABILITY

As a member of IAATO we follow guidelines appointed by the Antarctic Treaty System to go above and beyond in support of minimizing negative impacts on this pristine landscape. We also encourage clients to look to book pre-and post- accommodation with us, where local businesses will be supported. Our clients also receive restaurant recommendations which support locally owned restaurants

We carefully select all ships we work with and choose smaller sized vessels to create less impact. We use a highly regulated, licensed vessel which is well equipped to operate in the Antarctic's delicate ecosystem. We view the voyage to the Antarctic as an expedition, not a sightseeing trip. Smaller boats such as ours can navigate narrow waterways and are far less polluting than the larger ships in Antarctic waters. By carrying less passengers, we have far less waste. The waste is carried back to the home port to allow for environmentally conscious waste management and disposal.
