

ANTARCTICA - ANTARCTICA

INTRODUCTION

This cruise delivers you to wondrous landscapes found in one of the harshest environments on Earth. Meet the great stars of the Antarctic, the penguins, found in the thousands in a variety of curious species. Come say hello to whales, seals, and thousands of penguins.

SPECIAL INFORMATION: 22 Jan 2026 departure includes a Navigational Workshop. Be part of a true polar expedition! During this adventurous voyage, we will visit some of Antarctica's remote islands. This includes the Wauwermans Islands (close to Anvers Island), where we will chart and make depth measurements while exploring the area in our Zodiac boats and kayaks. Navigation workshops and presentations about historic Antarctic voyages are also part of this exciting activity-based expedition.

Select this activity if you're interested in learning the history, theory, and practice of land and sea navigation. Topics covered include the use of sextants, chart positioning, and GPS functions, among others. All courses are led by experienced expedition guides. No additional equipment needed.

**Rates are subject to currency fluctuation and availability at the time of booking. Please contact us for the latest pricing and availability.*

ANTARCTICA - ANTARCTICA

DAY 1: Embarkation in Ushuaia

Your voyage begins where the world drops off. Ushuaia, Argentina, reputed to be the southernmost city on the planet, is located on the far southern tip of South America. Starting in the afternoon, you embark from this small resort town on Tierra del Fuego, nicknamed "The End of the World," and sail the mountain-fringed Beagle Channel for the remainder of the evening.

DAY 2: Crossing The Drake - Day 2 & 3

Over the next two days on the Drake Passage, you enjoy some of the same experiences encountered by the great polar explorers who first charted these regions: cool salt breezes, rolling seas, maybe even a fin whale spouting up sea spray. After passing the Antarctic Convergence - Antarctica's natural boundary, formed when north-flowing cold waters collide with warmer sub-Antarctic seas - you are in the circum-Antarctic upwelling zone. Not only does the marine life change, the avian life changes too. Wandering albatrosses, grey-headed albatrosses, black-browed albatrosses, light-mantled sooty albatrosses, cape pigeons, southern fulmars, Wilson's storm petrels, blue petrels, and Antarctic petrels are a few of the birds you might see.

LOCATIONS

Antarctic Peninsula

DAY 4: Antarctica - Day 4 to 7

Gray stone peaks sketched with snow, towers of broken blue-white ice, and dramatically different wildlife below and above. You first pass the snow-capped Melchior Islands and Schollaert Channel, sailing between Brabant and Anvers Islands. Sites you may visit include: Danco Island - Activities here may focus on the gentoo penguins nesting on the island, in addition to the Weddell and crabeater seals that can be found nearby. Neko Harbour - An epic landscape of mammoth glaciers and endless wind-carved snow, Neko Harbour offers opportunities for a Zodiac cruise and landing that afford the closest views of the surrounding alpine peaks. Paradise Bay - You may be able to take a Zodiac cruise in these sprawling, ice-flecked waters, where there's a good chance you'll encounter humpback and minke whales.

ANTARCTICA - ANTARCTICA

DAY 8: South Shetland Islands

The volcanic islands of the South Shetlands are windswept and often cloaked in mist, but they do offer subtle pleasures: There's a wide variety of flora (mosses, lichens, flowering grasses) and no small amount of fauna (gentoo penguins, chinstrap penguins, southern giant petrels). In Deception Island, the ship plunges through Neptune's Bellows and into the flooded caldera. Here you find hot springs, an abandoned whaling station, and thousands of cape petrels - along with kelp gulls, brown and south polar skuas, and Antarctic terns. A good hike is a possibility in this fascinating and desolate volcanic landscape. As an alternative, you may be able to engage in activities near Half Moon Island. Here chinstrap penguins and Weddell seals often haul out onto the beach near Cámara Base, an Argentine scientific research station. Conditions on the Drake Passage determine the exact time of departure.

DAY 9: At Sea - Drake Passage - Day 9 & 10

Your return voyage is far from lonely. While crossing the Drake, you're again greeted by the vast array of seabirds remembered from the passage south. But they seem a little more familiar to you now, and you to them.

DAY 11: Disembarkation in Ushuaia

Every adventure, no matter how grand, must eventually come to an end. It's now time to disembark in Ushuaia, but with memories that will accompany you wherever your next adventure lies.

SUSTAINABILITY

GUIDANCE FOR VISITORS TO THE ANTARCTIC

RECOMMENDATION XVIII-1, ADOPTED AT THE ANTARCTIC TREATY MEETING, KYOTO, 1994

ANTARCTICA - ANTARCTICA

Activities in the Antarctic are governed by the Antarctic Treaty of 1959 and associated agreements, referred to collectively as the Antarctic Treaty System. The Treaty established Antarctica as a zone of peace and science.

In 1991, the Antarctic Treaty Consultative Parties adopted the Protocol on Environmental Protection to the Antarctic Treaty, which designates the Antarctic as a natural reserve. The Protocol sets out environmental principles, procedures and obligations for the comprehensive protection of the Antarctic environment, and its dependent and associated ecosystems. The Consultative Parties have agreed that as far as possible and in accordance with their legal system, the provisions of the Protocol should be applied as appropriate. The Environmental Protocol was ratified in January 1998.

The Environmental Protocol applies to tourism and non-governmental activities, as well as governmental activities in the Antarctic Treaty Area. It is intended to ensure that these activities, do not have adverse impacts on the Antarctic environment, or on its scientific and aesthetic values.

This Guidance for Visitors to the Antarctic is intended to ensure that all visitors are aware of, and are therefore able to comply with, the Treaty and the Protocol. Visitors are, of course, bound by national laws and regulations applicable to activities in the Antarctic.

PROTECT ANTARCTIC WILDLIFE

Taking or harmful interference with Antarctic wildlife is prohibited except in accordance with a permit issued by a national authority.

Do not use aircraft, vessels, small boats, or other means of transport in ways that disturb wildlife, either at sea or on land.

Do not feed, touch, or handle birds or seals, or approach or photograph them in ways that cause them to alter their behavior. Special care is needed when animals are breeding or molting.

Do not damage plants, for example by walking, driving, or landing on extensive moss beds or lichen-covered scree slopes.

Do not use guns or explosives. Keep noise to the minimum to avoid frightening wildlife.

Do not bring non-native plants or animals into the Antarctic, such as live poultry, pet dogs and cats, or house plants.

RESPECT PROTECTED AREAS

A variety of areas in the Antarctic have been afforded special protection because of their particular ecological, scientific, historic, or other values. Entry into certain areas may be prohibited except in accordance with a permit issued by an appropriate national authority.

Activities in and near designated Historic Sites and Monuments and certain other areas may be subject to special restrictions.

Know the locations of areas that have been afforded special protection and any restrictions regarding entry and activities that can be carried out in and near them. Observe applicable restrictions.

ANTARCTICA - ANTARCTICA

Do not damage, remove, or destroy Historic Sites or Monuments or any artifacts associated with them.

RESPECT SCIENTIFIC RESEARCH

Do not interfere with scientific research, facilities or equipment.

Obtain permission before visiting Antarctic science and support facilities; reconfirm arrangements 24-72 hours before arrival; and comply with the rules regarding such visits.

Do not interfere with, or remove, scientific equipment or marker posts, and do not disturb experimental study sites, field camps, or supplies.

BE SAFE

Be prepared for severe and changeable weather and ensure that your equipment and clothing meet Antarctic standards. Remember that the Antarctic environment is inhospitable, unpredictable, and potentially dangerous.

Know your capabilities and the dangers posed by the Antarctic environment, and act accordingly. Plan activities with safety in mind at all times.

Keep a safe distance from all wildlife, both on land and at sea.

Take note of, and act on, the advice and instructions from your leaders; do not stray from your group.

Do not walk onto glaciers or large snow fields without the proper equipment and experience; there is a real danger of falling into hidden crevasses.

Do not expect a rescue service. Self-sufficiency is increased and risks reduced by sound planning, quality equipment, and trained personnel.

Do not enter emergency refuges (except in emergencies). If you use equipment or food from a refuge, inform the nearest research station or national authority once the emergency is over.

Respect any smoking restrictions, particularly around buildings, and take great care to safeguard against the danger of fire. This is a real hazard in the dry environment of Antarctica.

KEEP ANTARCTICA PRISTINE

Antarctica remains relatively pristine, the largest wilderness area on Earth. It has not yet been subjected to large-scale human perturbations. Please keep it that way.

Do not dispose of litter or garbage on land. Open burning is prohibited.

Do not disturb or pollute lakes or streams. Any materials discarded at sea must be disposed of properly.

Do not paint or engrave names or graffiti on rocks or buildings.

Do not collect or take away biological or geological specimens or man-made artifacts as a souvenir, including rocks, bones, eggs, fossils, and parts or contents of buildings.

Do not deface or vandalize buildings or emergency refuges, whether occupied, abandoned, or unoccupied.
