### DAY 1: Embarkation in Ushuaia

Arrive in Ushuaia, Argentina - the world's southernmost town. Before the embarkation, explore the quaint city or local countryside. Alternatively, consider a day trip off the beaten path to the raw, natural archipelago of Tierra del Fuego. It's a hiker's paradise with rugged snow-capped mountains, glaciers, flower-filled meadows and boggy quagmires. In the afternoon, you will board the ship and settle into your cabin before setting sail for Antarctica. After our mandatory safety drill, our expedition begins as we navigate through the calm waters of the famous Beagle Channel (named for Charles Darwin's ship). This steep-sided strait divides southern Tierra del Fuego between Chile and Argentina, and has been the jumping-off point for thousands of expeditions into the unknown. Watch out for whales and dolphins as we sail off the edge of the map into the tempestuous Drake Passage.

### DAY 2: Crossing the Drake - Day 2 & 3

Sailing onward, we cross the famed Drake Passage - a body of water that marks the intersection of the cold Antarctic with the warmer Atlantic and Pacific Oceans. Drake Passage is known for rollicking conditions and strong westerly winds, called the Roaring Fifties. While this passage may be challenging, you can rest confidently aboard our expedition vessel, Ocean Victory, which is purpose-built with stabilizers, powerful engines and a highly-qualified crew. The most spirited sailors consider Drake Passage a lifetime achievement, and you will complete the crossing twice! Our days in the Drake Passage will be put to good use preparing for our arrival in Antarctica - your Expedition Leader will brief you comprehensively on how to stay safe and minimise your impact on this precious wilderness, as well as briefing you thoroughly on our plans for our time spent exploring, including hints and tips for wildlife watching. Our dedicated Expedition Team will assist you to biosecure your clothing and equipment (a vital process to protect Antarctica's delicate ecology), as well as sharing tailored lectures on Antarctic exploration history, wildlife, geology, glaciology and more!

### DAY 4: Antarctica & South Shetland Islands - Day 4 to 7

Over the next days, we will enjoy a safe and exciting Antarctic experience explorers of yesteryear could only dream of. Our Antarctic adventure begins in the South Shetland Islands. This chain of rugged rocks marks the northernmost point of Antarctica, and the most exposed to the fury of the Southern Ocean. Because of this, it is also one of the richest in terms of wildlife, with large Gentoo and Chinstrap Penguin colonies, and an abundance of large seabirds such as predatory Giant Petrels. The ice-clad mountains of Livingstone, Greenwich and King George Islands give us a glimpse of what is to come as we venture further south. Landing sites which may be visited in the South Shetland Islands include the black steaming sands and rusting ruins of Deception Island (an active volcanic crater), the bustling penguin colonies of Aitcho and Half Moon Islands, or the old sealers' anchorage of Yankee Harbour. The following days will be spent exploring further south on the Antarctic Peninsula in the Gerlache Strait region. This region is typically icy, so our exact route will be subject to careful planning by the Expedition Leader and Captain - however we will aim to visit a range of sites which showcase the best of this staggeringly beautiful region. Consisting of the 'spine' of the Antarctic Peninsula and a large number of glaciated and mountainous islands, the Gerlache Strait is what comes to mind when most people think of Antarctica. Marvel at the massive icebergs and vast glaciers on a Zodiac cruise in Paradise Bay. Be moved by penguins tenderly caring for their precious eggs, and fiercely defending their nests on Cuverville Island. Watch cataracts of ice tumble into clear blue ocean on a hike over the active glaciers of Neko Harbour. Experience the Antarctica of old at historic huts such as Damoy Point, lovingly restored and open to all. Feel the spray of water from the blow of a humpback whale on a Zodiac safari in Wilhelmina Bay. Wonder at awe-inspiring scenery on a ship cruise through the Lemaire Channel. Wherever we go on the Antarctic Peninsula, endemic wildlife, tantalizing history and breathtaking natural beauty abound.

### DAY 8: Depart Antarctica, At Sea - Day 8 & 9

We eventually depart Antarctica, and spend two days at sea on our way northwards back across the infamous Drake Passage towards the more welcoming shores of the Beagle Channel and Ushuaia, Argentina. During our time at sea, a variety of activities will be arranged on board to provide our guests with the chance to reflect on their voyage. Relax with an expertly crafted cocktail in the Nordic Bar in the company of new friends, soak up the knowledge and passion of our Expedition Team during lectures in the Shackleton Lounge, or simply enjoy the flight of the albatross which accompany us northwards. During your last evening onboard, join the Captain and Officers for the Farewell Cocktail Party, followed by a presentation of photos and video by our onboard photographer - the ideal opportunity to re-live your Antarctic adventure.

### DAY 10: Disembarkation in Ushuaia

On the morning of the final day of our voyage, we will arrive back at the pier of Ushuaia, Argentina. Trees, grass and a busy city may seem strange to you after the white wilderness of Antarctica! After a hearty breakfast, it is time to bid a fond farewell to the Crew and Albatros Expedition Team, and descend the gangway back to dry land with memories of the voyage of a lifetime.

## SUSTAINABILITY

We appreciate that voyages to the Antarctic to have an impact on this pristine environment. In light of this, all our voyages are double carbon offset. In addition, we strive to eliminate as many single use plastics as possible from our supply chain. In choosing this voyage you are also supporting the fantastic work done by the Antarctic Science Foundation (ASF) and their work in understanding and protecting this unique destination. In addition all voyages support the Mawsons Huts Foundation (MHF). The MHF support the legacy of Sir Douglas Mawson, the legendary Antarctic explorer and scientist. As a member of IAATO we follow strict guidelines appointed by the Antarctic Treaty System to go above and beyond in support of minimizing negative impacts on this pristine landscape. We also encourage clients to look to book pre-and post-accommodation with us, where local businesses will be supported. Our clients also receive restaurant recommendations which support locally owned restaurants.

We carefully select all ships we work with and choose smaller sized vessels to create less impact. We use a highly regulated, licensed vessel which is well equipped to operate in the Antarctic's delicate ecosystem. We view the voyage to the Antarctic as an expedition, not a sightseeing trip. Smaller ships such as ours can navigate narrow waterways and are far less polluting than the larger ships in Antarctic waters. By carrying less passengers, we have far less waste. The waste is carried back to the home port to allow for environmentally conscious waste management and disposal.
