

## INTRODUCTION

Embark on an incredible expedition to the Subantarctic islands of New Zealand. These 'forgotten' islands are often omitted from the mind of the exploratory traveller. However, despite their low profile, these islands are some of the most remarkable wildlife reserves in the Southern Ocean and designated UNESCO world heritage sites. Departing from Invercargill on board the Heritage Adventurer you will explore islands dotted with honey-combed seabird cliffs, windswept Rata forests, flowering fields of incredible 'megaherbs' and unforgettable wildlife experiences from Snare crested Penguin to majestic Royal Albatross. Discover one of the most pristine ecosystems that truly to this day unheard of.

## ITINERARY

### DAY 1: Arrive Invercargill

Guests should make their way to the designated hotel where we will spend the first night of the expedition. This evening there will be an informal get-together at the hotel for dinner; an excellent opportunity to meet fellow adventurers on your voyage and some of our expedition team.

**DAY 2: Embarkation in Bluff**

Today we enjoy breakfast in the hotel restaurant and have the morning free to explore the city before returning to the hotel for lunch and departing for the Port of Bluff to embark your ship. You will have time to settle into your cabin and familiarise yourself with the ship; we will also take the opportunity to conduct a number of safety briefings. You are invited to join the expedition team in the Observation Lounge and up on the Observation Deck as we set our course to Campbell Island and our adventure begins. We will sail past Ruapuke Island, formerly a local Maori stronghold supporting a population of over 200 people. We will also be able to see Stewart Island. Despite appearing quite small on most maps it is really quite large and has a 700 kilometre coastline. Seabirds that we may encounter at this early point in the voyage include: albatross, petrels, cormorants, gulls and Little Blue Penguins.

Subantarctic Islands of New Zealand

**DAY 3: At Sea**

As we make our way through the Southern Ocean we take the opportunity to learn more about the flora and fauna as we prepare for our arrival at Campbell Island. En route there are great birding opportunities which may include the Wandering Albatross, Royal Albatross, Black-browed Albatross, Light-mantled Sooty Albatross, Salvin's Albatross, Campbell Island Albatross, Northern and Southern Giant Petrel, Sooty Shearwater and Little Shearwater. There should be plenty of petrels and again the hard to identify prion species. We can expect some of the best pelagic birding on this leg of the journey from Bluff to Campbell Island with great views during the crossing.

**DAY 4: Campbell Island**

We have a full day to explore Campbell Island, New Zealand’s southernmost Subantarctic territory. Its history is as rich and varied as the other islands we visit. Discovered in 1810, it was soon occupied by sealers who introduced rats and cats. Farming followed from 1895 to 1934 when it was abandoned. Coastwatchers were stationed on the island during the war and at the end of the war the station was taken over by the New Zealand Metrological service. They maintained a manned weather/ research station there until 1995. In the early 1970s the removal of farm animals commenced and all were eventually removed by 1990. The vegetation recovered quickly and the cats died out naturally. In a very ambitious (and never before attempted on such a large scale) eradication programme the New Zealand Department of Conservation successfully removed the rats. With the island declared predator free, the way was clear to reintroduce the endangered Campbell Island Flightless Teal, which had been rediscovered on an offshore island in 1975. Snipe, which were formerly unknown from the island but were discovered on another offshore island, recolonised the islands themselves. The vegetation which the great English botanist Sir Joseph Hooker described in 1841 as having a “Flora display second to none outside the tropics” is flourishing and is nothing short of spectacular. We will offer a number of options which will enable you to explore the island including an extended walk to Northwest Bay. There will also be an easier walk to the Col Lyall Saddle. All of these options will allow you the opportunity and time to enjoy the Southern Royal Albatross which nest here in large numbers. We also visit areas of the island which contain outstanding examples of the megaherbs for which the island is renowned.

**DAY 5: Carnley Harbour**

In the south of the archipelago there is a very large sheltered harbour rich in human history including shipwrecks, treasure hunters, Coastwatchers and, of course, scientific parties. We plan to arrive mid-morning entering the harbour through the eastern entrance which is guarded on both sides by dramatic cliffs and climb there will be an opportunity to Zodiac cruise along the coast of Adams Island, Western Harbour and Victoria Passage. Other options include the Tagua Bay Coastwatcher's hut and lookout which was occupied during the Second World War. We could visit Epigwatt and the remains of the Grafton which was wrecked here in 1864. All five men aboard survived and lived here for 18 months before sailing their modified dinghy to New Zealand to get help. Two of the survivors wrote books about their ordeal, their first-hand accounts tell us a lot about their time here. Later this evening we will sail up the eastern coast, making our way to Port Ross in preparation for our landing at Enderby Island.

**DAY 6: Auckland Islands – Enderby Island**

The Auckland Islands group was formed by two volcanoes which erupted some 10-25 million years ago. They have subsequently been eroded and dissected by glaciation creating the archipelago as we know it today. Enderby Island is one of the most beautiful islands in this group and is named after the same distinguished shipping family as one of our former vessels. This northern most island in the archipelago is an outstanding wildlife and birding location and is relatively easy to land on and walk around. The island was cleared of all introduced animals (pests) in 1994 and both birds and the vegetation, especially the herbaceous plants, are recovering both in numbers and diversity. Our plan is to land at Sandy Bay, one of three breeding areas in the Auckland Islands for the Hooker’s or New Zealand Sea Lion, a rare member of the seal family. Beachmaster bulls gather on the beach, defending their harems from younger (ambitious) males, to mate with the cows shortly after they have given birth to a single pup. Hooker’s or New Zealand Sea Lion numbers are in a slow decline, for reasons which are not obvious but most probably connected with a nearby squid fishery. During our day ashore there will be several options, some longer walks, some shorter walks and time to spend enjoying the wildlife. The walking is relatively easy. A boardwalk traverses the island to the dramatic western cliffs, from there we follow the coast and circumnavigate the island. Birds that we are likely to encounter include the following species: Southern Royal Albatross, Northern Giant Petrel, Auckland Island Shag, Auckland Island Flightless Teal, Auckland Island Banded Dotterel, Auckland Island Tomtit, Bellbird, Pipit, Red-crowned Parakeet, Yellow-eyed Penguin and Light-mantled Sooty Albatross. There is also a very good chance of seeing the Subantarctic Snipe. Other more common species we will see include the Goldfinch, Song Thrush, Blackbird, European Starling, Red-billed Gull and Redpoll. On Derry Castle Reef we will look for migratory waders which could include Bar-tailed Godwit, Turnstone and possibly vagrants.

## SUB ANTARCTIC ISLANDS - FORGOTTEN ISLANDS OF THE SOUTH PACIFIC | HERITAGE ADVENTURER

### DAY 7: The Snares - North East Island

The closest Subantarctic Islands to New Zealand, they were appropriately called The Snares as they were once considered a hazard for sailing ships. Comprising of two main islands and a group of five islands called the Western Chain; they are uninhabited and enjoy the highest protection as Nature Reserves. It is claimed by some that these islands are home to more nesting seabirds than all of the British Isles together. We plan to arrive in the morning, and as landings are not permitted, we will Zodiac cruise along the sheltered eastern side of the main island if the weather and sea conditions are suitable. In the sheltered bays, we should see the endemic Snares Crested Penguin, Snares Island Tomtit and Fernbirds. There are hundreds of thousands of Sooty Shearwaters nesting on The Snares; the actual number is much debated. Buller's Albatross breed here from early January onwards. There will be opportunities to view the forests of large tree daisy *Olearia lyallii* which forms a canopy over much of the island group. Tonight we enjoy a farewell and celebratory dinner with newfound friends with time to reflect on a wealth of new experiences and recap on what amazing wildlife, plant life, landscapes and history we have enjoyed.

### DAY 8: Disembark in Bluff and transfer to the airport

Spend the morning exploring Stewart and Ulva Islands. Rich in history and wildlife, Ulva Island has been predator-free since 1997 and its bird song and wildlife is some of the best in New Zealand. Say your farewells be transferred to either Invercargill or Queenstown Airport. In case of unexpected delays, we ask you not to book any onward travel from Invercargill before 3pm or before 6pm from Queenstown. Note: During our voyage, circumstances may make it necessary or desirable to deviate from the proposed itinerary. This can include poor weather and opportunities for making unplanned excursions. Your Expedition Leader will keep you fully informed. Landings at the Subantarctic Islands of New Zealand are by permit only as administered by the Government of New Zealand. No landings are permitted at The Snares.

## INCLUSIONS & DETAILS

**Accommodation** Hotel & Cabin Onboard a Ship

### INCLUSIONS

Pre/post cruise transfers to/from the ship (does not include airport arrival transfer to hotel)\*

One night hotel accommodation in Invercargill in a twin share room (incl. dinner/breakfast)

Cabin Accommodation on board vessel

All meals whilst on board; house beer, wine and soft drinks with lunch and dinner

Landing Fees (valued at 500USD per person)

Guiding and lectures by experienced expedition crew

Expeditions by zodiac according to itinerary

\* If you arrive in Queenstown, you can join our complimentary coach transfer leaving at 3 PM from the designated meeting point on Day 1 of the itinerary. Upon disembarkation you can take a complimentary coach transfer to either Invercargill or Queenstown Airports.

### Inclusions

### EXCLUSIONS

International flights

Airport arrival transfers, taxes and excess baggage charges unless specified

Meals other than those specified in the pre-departure information

Pre or post cruise travel expenses

Any optional activities not mentioned in itinerary

Visa and reciprocity fees (if applicable)

Travel insurance

All items of a personal nature

Laundry and drinks

Customary gratuities for staff and expedition crew

**Difficulty Rating** 2 (light adventure)

**Single Surcharge** Available on request. Subject to availability. Please contact us for more information.
