INTRODUCTION

This five-day cruise explores the central and southern GalÃ¡pagos Islands through a mix of guided walks, snorkelling and small-boat excursions. With experienced naturalist guides leading each outing, guests spend their days discovering the islands at a relaxed pace while learning about the wildlife and ecosystems that make the GalÃ¡pagos so unique.

The itinerary includes visits to EspaÃ±ola, Floreana, Santa Fe and South Plaza, with standout experiences such as snorkelling at Devil's Crown, swimming alongside sea lions, and walking through seabird colonies and iguana habitats. Encounters with reef sharks, rays, sea turtles, blue-footed boobies, frigatebirds and finches are common, and the journey finishes with a visit to the Charles Darwin Research Station, offering insight into the conservation work protecting the islands.

**Itinerary valid from 1st April 2026 onwards*

GALAPAGOS ISLANDS - SOUTH EASTERN GALAPAGOS ISLANDS CRUISE A

DAY 1: Arrive Galapagos

AM: SAN CRISTOBAL AIRPORT ARRIVAL Embark on an unforgettable journey to the Galapagos Islands, where nature thrives in its purest form. Your adventure begins at San Cristobal's modest yet bustling airport, where a seasoned naturalist guide will greet you. This guardian of the ecosystem will introduce you to a world of breathtaking landscapes and unparalleled biodiversity. Feel the excitement as you step into this living sanctuary, a UNESCO World Heritage site, marking the beginning of an extraordinary exploration. PM: LOBOS ISLAND Lobos Island, a small islet near San Cristóbal, offers an unforgettable wildlife experience. Upon landing, groups of sea lions will greet you as they play in tidal pools. Walking inland, you'll spot frigatebirds perched in bushes, displaying their inflated red pouches, while blue-footed boobies nest along the trail, performing their iconic courtship dance. In the calm waters, snorkeling provides an incredible opportunity to swim with playful sea lions, while sea turtles and rays rest on the sandy bottom.

DAY 2: Gardner Bay & Suarez Point

AM: GARDNER BAY Gardner beach is undoubtedly one of the most beautiful and interesting beaches to visit in the Galapagos. Its fine coral sand and turquoise water give it a totally tropical appearance, which contrasts with the presence of sea lions basking in the beach. You will have the opportunity to walk along the beach and learn about the biology of sea lions and other endemic species, such as the Española mockingbird, marine iguanas and Galapagos hawks. PM: SUAREZ POINT This rocky trail is one the most amazing nature walks you can do in the Galapagos islands. From the moment you set foot on the island and all the way along the trail the amount and diversity of fauna is truly amazing. Sea lions and marine iguanas will be the first ones welcoming us, followed by large colonies of sea birds, including Nazca and Blue-footed boobies, gulls and tropicbirds. At the end of the trail we will visit a colony of waved albatross (April to January), the largest bird in the islands and one of the most interesting because of its powerful flight and elaborate courtship. Waved albatross only nest at Española, so this is the only place where you will see them at close range.

GALAPAGOS ISLANDS - SOUTH EASTERN GALAPAGOS ISLANDS CRUISE A

DAY 3: Post Office Bay & Cormorant Point

AM: POST OFFICE BAY Floreana is famous for the tales of German settlers and the baroness during the late 1920's and 30 's. Assassinations, disappearances and other unsolved mysteries are the ingredients of this fascinating story. Post office bay was often used by whalers to anchor their ships and go up to the highlands to get freshwater and tortoises. Most boats visiting the Galapagos had to came to this place sooner or later, so a system of mail was established more than 200 years ago: a barrel near the beach became the way to leave messages to other ships and also to the outside world. This mail system is still in use and will allow you to send postcards from the Galapagos to the outside world. Aside from a small beautiful beach, the area is great for dinghy tours to look for sea lions, green sea turtles, shorebirds, small sharks and, with some luck, Galapagos penguins. PM: CORMORANT POINT & DEVIL'S CROW Punta Cormorant is located in the north of Floreana and it is known for its large coastal lagoon with American flamingos, white-cheeked pintails, black-necked stilts and other shorebirds. There is a beautiful white sand beach which is an important nesting ground for green sea turtles where we can also see rays and reef sharks. In recent years, a small group of blue footed boobies have started to breed right by the trail. This is also a great trail day to look at endemic plants.

GALAPAGOS ISLANDS - SOUTH EASTERN GALAPAGOS ISLANDS CRUISE A

DAY 4: Santa Fe & South Plaza

AM: SANTA FE Santa Fe Island, nestled in one of the most stunning bays in the Galapagos, boasts towering prickly-pear cacti and ancient lava formations. Its white-sand beach and turquoise waters are home to a large sea lion colony basking under the sun. As you follow the trail, look for the endemic Santa Fe land iguana and, if lucky, a Galapagos hawk perched atop a cactus scanning for prey. Along the way, Darwin's finches, Galapagos doves, mockingbirds, and lava lizards are commonly seen, making this hike a true wildlife experience. PM: SOUTH PLAZA Of the two twin islands, only South Plazas is open to visitors, while North Plazas remains a scientific research site. Despite its small size, South Plazas is teeming with wildlife. Upon landing, ll find land iguanas lounging beneath Opuntia cacti, waiting for fallen fruit. A large sea lion colony dominates the shore, where playful pups explore tide pools while massive bulls defend their territory. The trail leads to a dramatic cliffside, offering breathtaking ocean views where frigatebirds, blue-footed boobies, red-billed tropicbirds, and swallow-tailed gulls soar. A blanket of reddish succulents covering the island adds to its striking beauty.

DAY 5: Depart Galapagos

AM: CHARLES DARWIN STATION The Charles Darwin Station is a nonprofit organization which has been working for decades together with the Galapagos National Park to preserve the biodiversity of these unique islands. During this visit you will learn about the projects that both institutions carry together to protect the native species and eradicate the invasive ones which are threatening the Galapagos environment. One of the most important and emblematic projects has been reproducing giant tortoises in captivity. The visit is mostly outdoors in a beautiful dry native forest with giant cactus and many other interesting native plants. It is also a fantastic place to find several endemic Darwin finches, as well as flycatchers and mockingbirds. After this activity you will be transferred to the airport where you will board your departure flight from the Galapagos.
